Further Studies Programmes

About

Advantage Learn is an online and blended learning organisation passionate about enabling learners to reach their true potential and excel in their future careers.

Advantage Learn does this by:

- Supporting learners at a high-school level with Grade 8 - 12 resources for Maths and Physical Science
- Empowering learners through Grade 9 -12 extension subjects called Further Studies Programmes
- Providing learners in Grade 12 with NBT Preparation resources

Further Studies Programmes for Grade 9 - 12

Designed for academically advanced learners, the Further Studies subjects (also known as Advanced Programmes) are designed to improve self-discipline and critical thinking skills. Because of this, the Further Studies subjects are the ideal way for learners to give themselves a competitive edge in their chosen degree programmes. These subjects are benchmarked internationally and open up doors to international universities.

- **Further Studies Maths** (Live Online, In Person, Guided Online options available)
- **Further Studies Physics** (Live Online, Guided Online options available)
- **Further Studies English** (Live Online only)

Learner responsibilities

- Students need to be respectful of their peers and educators.
- Students need to adhere to online lesson guidelines and WhatsApp group guidelines.

Programme requirements

Learners applying for these programmes need to have a strong core subject competency for the correlating subject.

- Learners applying for Further Studies Maths need to be achieving above 70% for Mathematics Core.
- Learners applying for Further Studies Physics need to be achieving above 75% for Physical Science.
- Learners applying for Further Studies English need to be achieving above 65% in English.

What learners say...

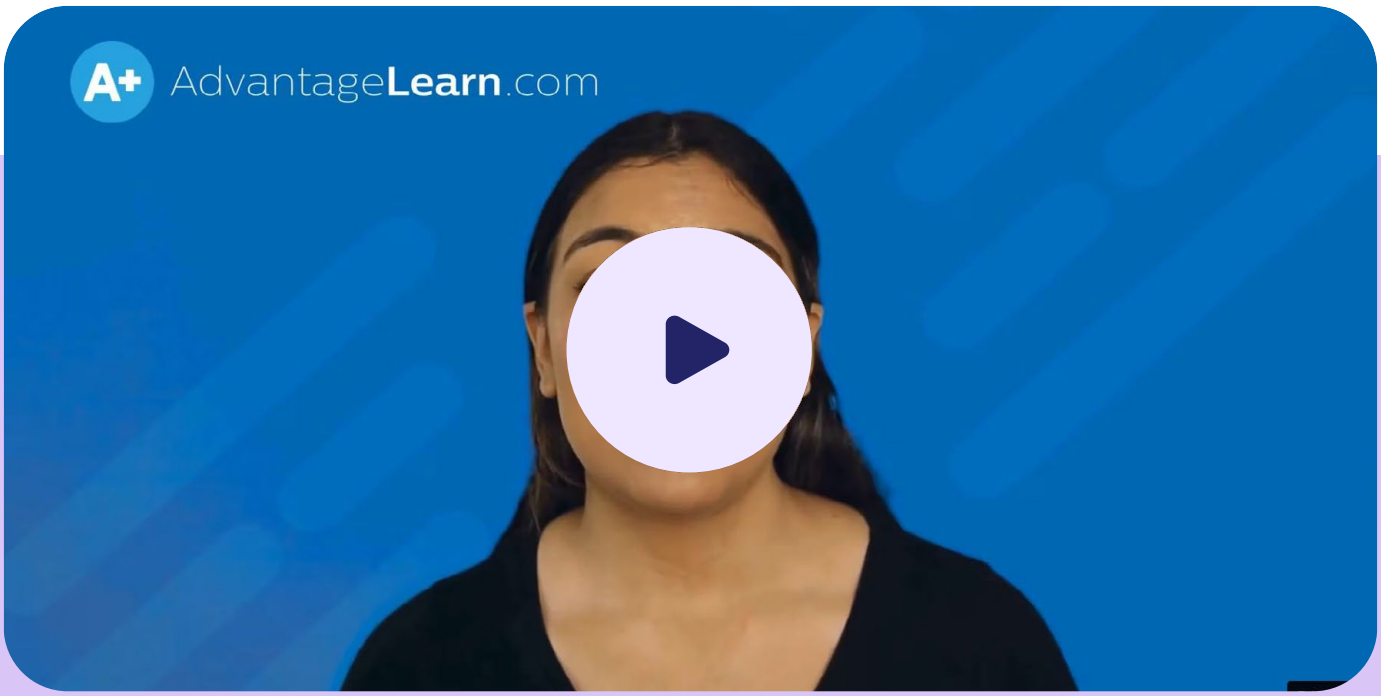

"I joined the Advantage Learn program because I had set my sights on studying Actuarial Science, which demands a strong foundation in Mathematics and Mathematical Statistics. The program has been instrumental in preparing me for my first-year courses in Mathematical Statistics and Mathematics.

What stood out to me the most was how Advantage Learn offered courses that mirrored the depth and rigour of university-level studies but were tailored for high school students. This not only sharpened my academic skills but also provided invaluable insight into university-level coursework and time management. I am currently in my second year at the University of Cape Town, pursuing Actuarial Science. The skills and confidence I gained from Advantage Learn have been indispensable."
